Project Design Phase
Proposed Solution

Date	05 Apr. 26
Team ID	SWTID-2026-6042
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	2 Marks

Proposed Solution:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The existing library system uses manual processes for book requests and approvals, leading to delays, lack of tracking, and inefficiency for both students and librarians.
2.	Idea / Solution description	The proposed solution is a Smart Library Request Workflow developed using ServiceNow. It allows: • Students to request books online • Librarians to approve/reject requests • Automatic update of book status (Available, Issued, Returned) • Real-time tracking of requests • Notifications via email
3.	Novelty / Uniqueness	Automated workflow using Flow Designer Role-based access control (Student & Librarian) Prevents requesting already issued books (reference qualifier) UI policies to control form behavior Integrated reporting (Most borrowed books)
4.	Social Impact / Customer Satisfaction	Saves time for students and librarians Reduces manual errors Improves transparency and communication Provides better user experience Helps in efficient library management
5.	Business Model (Revenue Model)	Can be implemented as a **subscription-based service** for educational institutions Colleges can pay for system setup and maintenance Additional revenue through customization and support services

6.	Scalability of the Solution	Can be extended to multiple departments or institutions Can integrate with other systems (student database, RFID, etc.) Can support large number of users and book records Future enhancements like mobile app or analytics dashboard
